**2 Informational Presentation by Tony Birrittieri, Petersen Management Company, LLC Regarding FAST Wastewater Treatment Systems and Discussion**

Mr. Birrittieri, General Manager of Petersen Onsite presented; Petersen Management Company, LLC is in the onsite wastewater treatment and disbursement business. They consult, design, install, service, operate and monitor said systems of which FAST is one brand of treatment system. They are in a five state area and have a presence internationally with a pipeline division. Mr. Birrittieri describe the components and operation of onsite wastewater treatment systems and explained that they draw on the water that is in the ground through wells, treat the wastewater and put clean water back into the soil to replenish the aquifer. The closest system in our area is located in the Village of Lake Hallie. The system consists of a collection system, treatment system, and discharge. Systems are monitored and samples are taken on a prescribed basis. He reviewed DNR regulations which are more stringent for an onsite system verse an individual septic system. Permits are issued from the State, DNR and the County; however the systems are regulated by the DNR. Commission members and Board members asked questions.
